WHO WE ARE

Latest technology. Cost-effective architecture. Committed timelines.

Motamax India Pvt. Ltd.'s business model is built on sustainability — responding to an organisation's core needs through the provision of the latest technology, cost-effective solution architecture, infrastructure development and quality of service, delivered on a committed timeline.

With commitment to sustainable development at the core of our business, we provide solutions to the critical needs of organisations and generate value beyond shareholders' earnings — based on three pillars: **environmental protection**, **social progress** and **economic growth**.

3
Core business domains

25+
Solution lines

40+
Reputed corporate & Govt. clients

11
Industries served

Our Mission

To be the leader in Solution Architecture of ICT, Electrical Infrastructure, Renewable Energies and best QoS services — sustainable development and value creation for stakeholders. We build our reputation for integrity, excellence and leadership by:

- Continuously improving the standards and quality of our solutions
- Constantly striving to exceed each customer's expectations
- Upholding the highest moral principles and a challenging, secure environment for our people
- Maintaining a high & committed service standard through relationships, expertise and experience

Our Vision

To achieve sustainable development in every area of activity, for the betterment of customers and society — both in the present and in the future.

Environmental
Protection

Social
Progress

Economic
Growth

Our Values

- Honesty
- Social Responsibility
- Leadership
- Long-term Focus
- Innovation
- Financial Soundness
- Care for People
- Customer Orientation
- Concern for the Environment

COMPANY ETHOS

"To be regarded by all of our stakeholders as honourable and conscientious."

OUR SERVICES

Three domains. One accountable partner.

Motamax is a specialist in industrial projects with high technological content — Industrial Infrastructure, Projects and Services — covering every aspect of electrical and IT processes: consulting, solution making, engineering, procurement, building and maintenance.

01 Solution Architecture

Designing the right combination of IT, security, communication and audio-visual systems for every site.

- IT Infrastructure
- CCTV & Security Solutions
- Telecom Solutions
- AVSI & Conferencing
- Data Centre Infrastructure
- Structured Cabling
- Time-lapse Systems
- PA Systems
- Indoor & Outdoor Displays
- Critical Walkie-Talkie Comms

02 Automation

Automating weighing, switching and business processes, with AI and analytics on top.

- Electrical Switch Automation
- Business Process Automation
- Video Analytics (CCTV + AI)
- HRMS, CLMS & Office Mgmt.
- Weighbridge Automation
- AI & Analytics
- Fleet & Vehicle Tracking
- Smart Classrooms

03 Infrastructure Development

Building the physical backbone — networks, fibre, power and site facilities.

- Wired & Wireless Networking
- OFC & FTTx Solutions
- Electrical Works (HT & LT)
- Power Backup Systems
- Structured Cabling
- Street Lighting Systems
- Solar Solutions
- Industrial Tools & Equipment

End-to-end lifecycle — one team from survey to maintenance

01	02	03	04	05	06	07	08
Consult	Design	Engineer	Supply	Install	Commission	Train	Maintain

CORE EXPERTISE · I

Power, IT and security — engineered together.

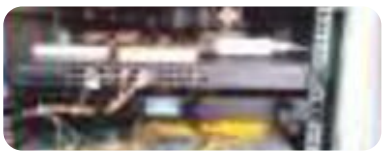

HT · LT · POWER
Electrical Services

- Complete process: application & liaisoning with DISCOM, inspection and charging
- HT & LT construction
- Electrical transformation — single pole, double pole and plinth-mounted substations from 16 kVA, overhead & underground cabling and civil foundations
- Electrical lighting solutions for industries
- All types of electrical panels and distribution boards
- Industrial HT & LT motors
- Compliance inspection consultancy — new and renewal
- DG supply, hiring, inspection and swapping in the telecom sector
- HVAC — equipment, filters, AHU, ducting, clean rooms, modular OT
- Online / offline UPS, battery systems and telecom ODC electrical activities

HARDWARE · NETWORK · DATA CENTRE
Information Technology

- IT hardware — desktops, laptops, multifunction printers and servers
- Office automation products
- Complete wired & wireless network infrastructure — indoor/outdoor access points, P2P links, RF devices
- Active devices — switches, routers, firewalls and IT security solutions
- Passive infrastructure — OFC (UG / overhead) and UTP cabling
- Racks, splicing and OTDR; Panduit and Fluke networks
- Complete data-centre infrastructure build-up
- IT operation and support services

SURVEILLANCE · ACCESS · SAFETY
CCTV Surveillance & Security

- Solution architecture and project build-up of CCTV for industries, plants and corporates
- CCTV analytics solutions
- Access control & biometric attendance systems
- Fire detection systems, boom barriers, flap and turnstile barriers
- Drones — from idea forge to civil and security applications
- HD cameras & monitoring for schools, colleges, corporate, industrial and home segments
- Digital, wired, wireless, GSM SIM-based and solar-based CCTV

CORE EXPERTISE · II

Automation, communication and site solutions.

AI & Business Process Automation

- Computer vision
- Time-lapse solutions
- Video analytics using CCTV & AI
- Process optimisation for time and resources
- Fleet and vehicle tracking
- Weighbridge automation
- Electrical switch automation
- HRMS, CLMS & office management

Communication Engineering

- Telecom infrastructure build-up
- EPABX / IPPBX / SIP & VoIP
- FTTx / IBD project construction
- NLD-OFC by HDD
- PA & VA systems
- Audio & video conferencing
- AVSI (audio-video system integration)
- Telepresence systems

Walkie-Talkie Services

- Emergency & critical communications
- MCX
- DMR
- TETRA
- 4G / 5G public and private networks

Display Solutions

- Video walls
- All-in-one systems
- Indoor & outdoor LED / LCD
- Interactive panels
- Control room solutions
- Industrial monitors

Smart Classroom Solutions

- Interactive board solutions
- Complete integrated solutions
- Digital classrooms

Solar

- Solar panels
- Inverters
- Batteries
- Lighting & other industrial applications

Industrial Project Requirements

- All types of tools & equipment
- Measuring instruments
- Environmental (Bio & Agri) solutions
- Dust suppression systems
- Utilities — air and gas services

One-Stop Construction Solution

- EPC services
- Temporary facilities & site preparation
- Design, installation, testing & commissioning of IT, electrical, telecom, CCTV, fire-fighting & security works

HOW WE DELIVER

From the first survey to years of uptime.

We provide end-to-end solutions — requirement analysis, supply, installation, testing, commissioning, training, handover and operational maintenance.

01
Requirement analysis
Site survey and discussion with your team to understand operational needs, constraints and compliance.

02
Solution architecture
Selecting the right mix of IT, electrical, security, communication and automation systems for the site.

03
Engineering & approvals
Detailed design, drawings and BOQ — including statutory liaisoning such as DISCOM applications.

04
Procurement & supply
Sourcing and supplying specified equipment, materials, tools and instruments.

05
Installation
Site execution — civil foundations, cabling, mounting and system integration.

06
Testing & commissioning
Inspection, testing and charging through to go-live, with results documented.

07
Training & handover
Training for operators and handover of systems and documentation.

08
Operational maintenance
Ongoing operation, AMC and support to keep systems running after handover.

Why Motamax?

Single point of accountability
One team owns design, supply, installation and maintenance — nothing falls between vendors.

Certified & compliant
ISO 9001:2015 quality management; MSME, GeM, DPIIT, GST, EPFO & ESIC registered.

Trusted by leaders
Serving JSW, JSPL, Reliance, Airtel, DRDO, IIT, NLC India, Indian Railways and more.

Committed timelines
Planned execution with documented testing and on-time commissioning.

Field-proven teams
Experience across plants, mines, ports, townships and Government campuses.

Long-term partnership
Training, AMC and responsive support long after go-live.

INDUSTRIES WE SERVE

Built for demanding environments.

Reputed corporates, manufacturing plants, mines, construction areas and Government organisations across Odisha, Rajasthan, Madhya Pradesh and beyond.

Steel & Metals

Continuous-process plants where networks, surveillance and power run without interruption.

JSW · JSPL · Jindal Stainless · IMFA · Hindalco

Mining

Remote operations that depend on reliable communication, surveillance and power.

Hindustan Copper · NLC India · OMC · Mines in Odisha, Rajasthan, MP

Manufacturing

IT, automation and electrical systems engineered to work together.

Reliance · Aditya Birla · UltraTech · MP Birla

Construction

Systems installed while the site is still being built — townships, towers, terminals.

AMSB Infra · DN Group · Vaterland · Falcon Crest · OEYE MEP

Government & PSU

Facilities with defined specifications and documentation requirements.

CPWD · AG Office · DRDO · LIC

Telecom

Network build-out and site electrical work for operators.

Bharti Airtel · STL

Ports & Logistics

Large perimeters and heavy vehicle movement.

Paradip Port Authority · KICTPL · Mahindra Logistics

Railways & Transport

Stations, terminals and corridors.

Indian Railways · RITES · BMRCL

Education & Research

Campuses, labs and smart classrooms.

IIT · DRDO · Siksha 'O' Anusandhan

Energy & Utilities

Generation, distribution and renewable installations.

Tata Power · OHPC · NLC India

Enterprise & Media

Corporate offices and broadcast facilities.

OTV · Luminous Infoways · Indian Oil · The HHI

One partner for every site.

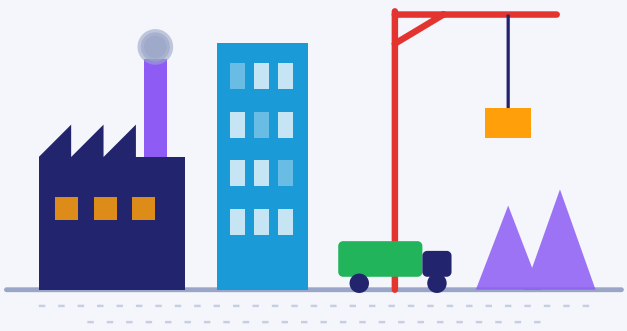

Survey to AMC — IT, electrical, security, communication and automation from a single accountable team.

WHERE WE WORK

Plants, mines, ports, townships & campuses

Projects delivered across Odisha, Rajasthan and Madhya Pradesh for corporates, PSUs and Government organisations — from greenfield construction sites to running plants.

Odisha · Rajasthan · Madhya Pradesh · Pan-India projects

SUCCESS STORIES

Delivered on site, trusted by leaders.

FEATURED · CONSTRUCTION

IT, CCTV & security for leading construction groups

Systems installed while the site is still being built, then handed over as a working, documented setup for residents and facility teams.

- **IT** — hardware, networking, telecom / intercom
- **CCTV** — perimeter, common areas, lifts and critical areas
- **Security** — boom barriers, biometric attendance, access control

Clients: AMSB Infra (Prestine Green), DN Group, Vaterland Group, Falcon Crest, Shradha Saboori Group (IOCL Township Expansion), OEYE MEP — Baibhav Group, Metro Group, Police Housing, Truck / Bus Terminals.

INDUSTRIAL

Surveillance & networks for integrated steel plants

JSW Group · Jindal Steel & Power

Plant-wide IT and security systems for continuous-process operations — CCTV & analytics, industrial networking, weighbridge automation and control rooms.

MINING

Connected, secured mines across three states

Hindustan Copper · NLC India · Odisha, Rajasthan & MP

Communication, surveillance and power for remote mining — including solar-powered CCTV and critical walkie-talkie networks.

TELECOM

OFC roll-out & telecom site power

Bharti Airtel · STL

Telecom infrastructure build-up: OFC / FTTx, NLD-OFC by horizontal directional drilling, DG and ODC electrical activities.

GOVERNMENT

Secure IT for defence, research & public offices

DRDO · IIT · CPWD · AG Office Bhubaneswar

IT infrastructure, data-centre components, CCTV and conferencing to defined Government specifications.

PORTS

Perimeter security for ports & terminals

Paradip Port Authority · KICTPL

Large-perimeter CCTV, weighbridge automation and critical communications for high-traffic environments.

ELECTRICAL

Substations & HT/LT electrical works

Industrial plants, utilities & OMC

From DISCOM application and liaisoning through transformer installation, panels and inspection to charging.

KEY CLIENTS

The privilege of serving India's reputed names.

Corporates, manufacturing plants, mines, construction groups and Government organisations — including NLC India (Ministry of Coal), Indian Railways, DRDO and IIT.
